

Feedback Form

Fax Back

To stay up-to-date on the ever-changing world of bioscience research, we rely on valuable input from our customers coupled with a thorough reading of the scientific literature. Please take a moment to provide us with your feedback on our products and their applications. We would also appreciate your input on this CD-ROM. All comments will be seriously reviewed and discussed; some may even set Molecular Probes off in new directions!

- 1) Can you suggest new products for Molecular Probes to offer? We are interested in reagents that require developmental work, reagents already described in the literature and reagents offered on consignment.

- 2) Can you suggest new applications, either published or unpublished, for any of the more than 2000 products currently offered by Molecular Probes?

- 3) Our bibliography database currently includes over 45,000 papers that cite the use of products we sell. Should your journal article be added to our bibliography? Submit your reference here.

- 4) Do you have any comments on the quality, performance or application of any of our products? We are especially interested in practical tips (e.g., useful solvents or cell-loading methods), as well as comparative data on similar probes. Please be as specific as possible.

- 5) Do you have any feedback on this CD-ROM, including suggestions for new or expanded features in subsequent editions?

- 6) **Important!** If you are submitting comments or questions requiring a response from us, please provide us with your name and e-mail address or other contact information.
